Making The HVN easy to trust and easy to buy

Evidence-backed strategy review for management

15 October 2026 · Version 2.0

Built on a live audit of the-hvn.com, a competitor review and six MiroFish simulations. Simulated agents are fictional and are used only to generate hypotheses, not as customer evidence.

Executive summary

A distinctive offer, undersold by the website. Fix first, then validate, then position.

Strongest findings (verified)

- Menopause, PCOS and PMDD pages list acne treatments
- 2 menu links return 404 on every page; 19 broken links
- Plan step unpriced; old programme pages 404
- CQC badge links nowhere; same 4 names on every page
- Price conflicts; credit rule only on £350 consultation
- IV claim wording; tap-to-call on 1 of 212 pages

Still unverified

- The HVN's CQC inspection status and scope
- Every competitor price, membership and rating
- All customer reactions (simulated, partly primed)
- Booking flow, response times, consultation output
- Conversion, retention and reviews (no data access)

Do first (30 days)

- Approve the fix list (R01, R02, R06, R10)
- Verify CQC status; link the badge (R05)
- Decide the programme tier (R03)
- Commission the claims review (R04)
- Start measurement + low-cost validation (R07; ≈£1.0–1.8k)

How to read the evidence

Every statement carries a source label and a confidence level

Label	Meaning	Decision use
[V] Verified	Loaded from the-hvn.com (crawl + re-check 15 Oct)	Yes
[Reg] Regulator	ASA/CQC material found via search	Context; confirm
[R] Reported	Press, PR, directories (all competitor facts)	No: treated as Unknown
[S] Simulated	Fictional LLM agents (MiroFish)	No: hypothesis
[?] Unknown	No data available	Must be checked

What we could and could not see

- Could: all 216 website URLs; prices; links; claims
- Could not: competitor sites, CQC/ASA registers, Pabau booking
- Had no: analytics, bookings, CRM, reviews, staff input
- Simulations: 6 runs, 57 interviews, $0.713 total
- No new simulations or paid API calls for this review

The offer is genuinely distinctive

Verified differentiators that rivals are not reported to combine

One doctor-led team

GP-trained Medical Director; women's-health doctor; acupuncture; osteopathy; nursing

Published prices

Prices on ~98% of service pages; 342 price points

No membership

Pay per visit; no joining fee (rivals reportedly sell memberships)

Doctor check before IV

'a brief 10 minute consultation with one of our doctors'

Women's-health capability

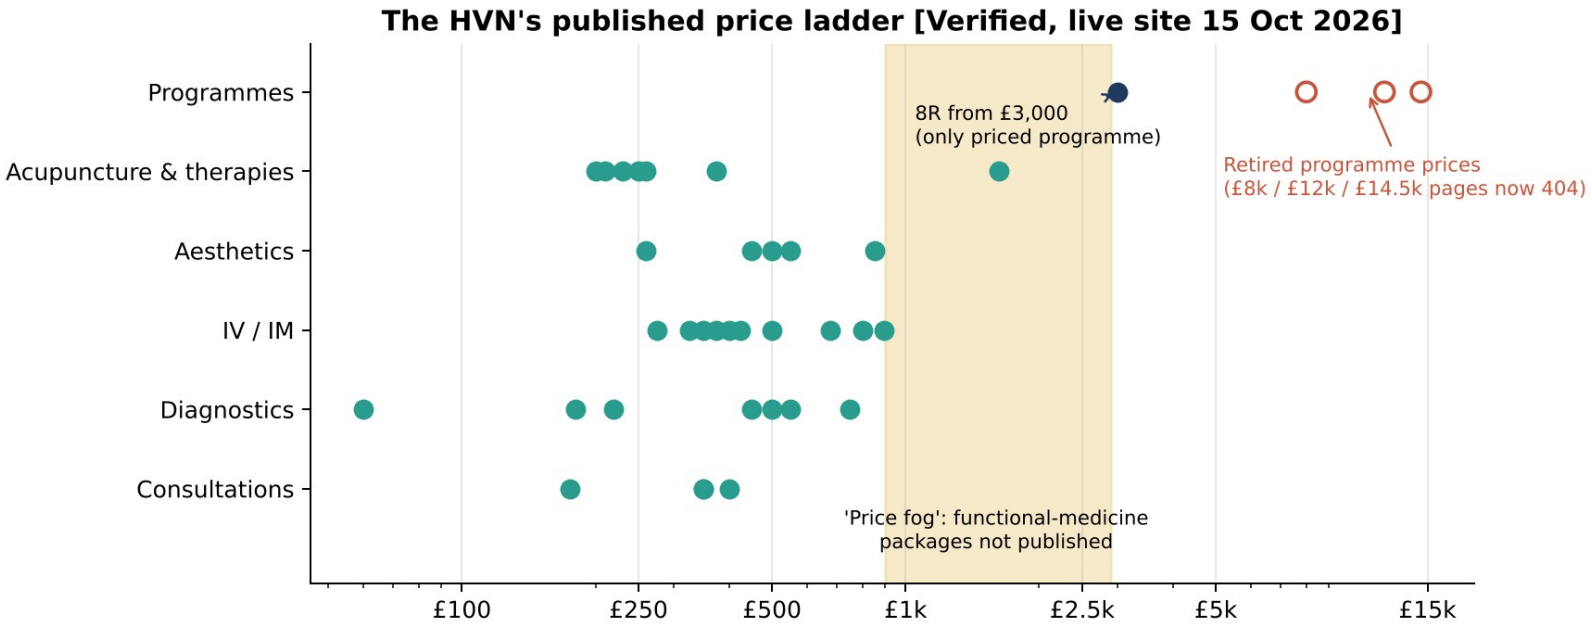

Doctor + extensive TCM women's-health content

Positioning candidate [H, to test]: "Doctor-led care for skin, energy and long-term health: one Knightsbridge team, clear prices, no membership."

Source: the-hvn.com crawl 15 Oct 2026; competitor-benchmark.md

The biggest commercial gap: 'price fog' after the first step

Transparent up to ~£750, then nothing priced except 8R 'from £3,000'

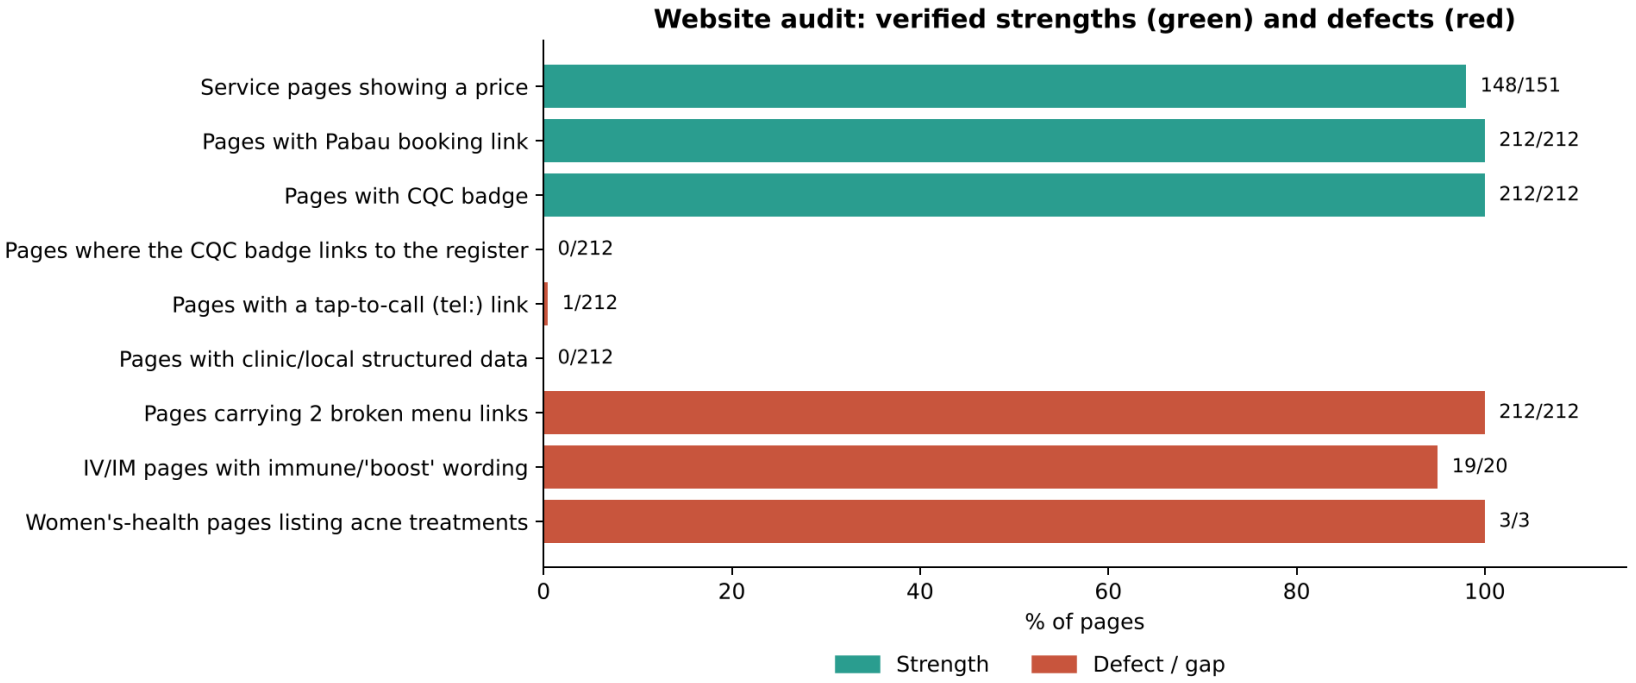

What to do

- Decide which programmes exist (R03)
- One fees-and-credits table (R08)
- Fix NAD and fertility price conflicts (R10)
- Publish typical ranges from real Pabau data, after testing the wording (R11)
- Simulated buyers asked for a written range, but the question was primed

Source: evidence/hvn-price-register-2026-10-15.csv; live re-check | The HVN strategy review · 15 Oct 2026 · 5

Website: strong foundations, avoidable defects

Also verified

- H1 'HOW THE HVN CAN HELP'; Contact/Booking titles say 'Skin & Hair'
- Two phone numbers
- No clinic/local structured data
- Median page: 713 KB HTML, 55 images
- Mobile and booking flow untested (blocked)

Source: website-audit.md; evidence/*.csv; re-check 15 Oct 2026

Three things to fix this month

All verified live on 15 October 2026; all low effort

1 · Women's-health pages

- /menopause/, /pcos/, /premenstrual-dysphoric-disorder/
- Block reads: 'Explore our specialised solutions for rosacea, acne, and acne scarring'
- Replace with the doctor + acupuncture + tests pathway (R01)

2 · Broken navigation

- 'Clinical Treatments' and 'Holistic Rituals' menu links return 404 on all 212 pages
- 19 broken internal links; a sitemap URL redirects into a 404
- Fix and add 301s (R02)

3 · Dead-end plan step

- Programme pages return 404
- 'Functional medicine' lands on an unfinished 'Updated' page
- Decide, publish or redirect (R03)

Source: Live re-check; website-audit.md W1–W3

Trust: proof exists but cannot be verified from the page

Buyers can't see who treats them, what the CQC covers, or the review rating

Signal	Today [V]	Fix
Who will treat me	Same 4 names on every page	Clinician per treatment (R13)
CQC	Badge on 212/212, linked on 0	Verify; link; accurate line (R05)
CQC status	UNKNOWN (not re-verifiable)	Registered manager checks at source
Reviews	Widget on 157 pages; rating not in HTML	Check rating; show it (R21)
IV safeguard	10-minute doctor check, unexplained	'Before your IV' explainer (R14)
Claims	Immune/boost on 19/20 IV/IM pages	CAP-code review (R04)

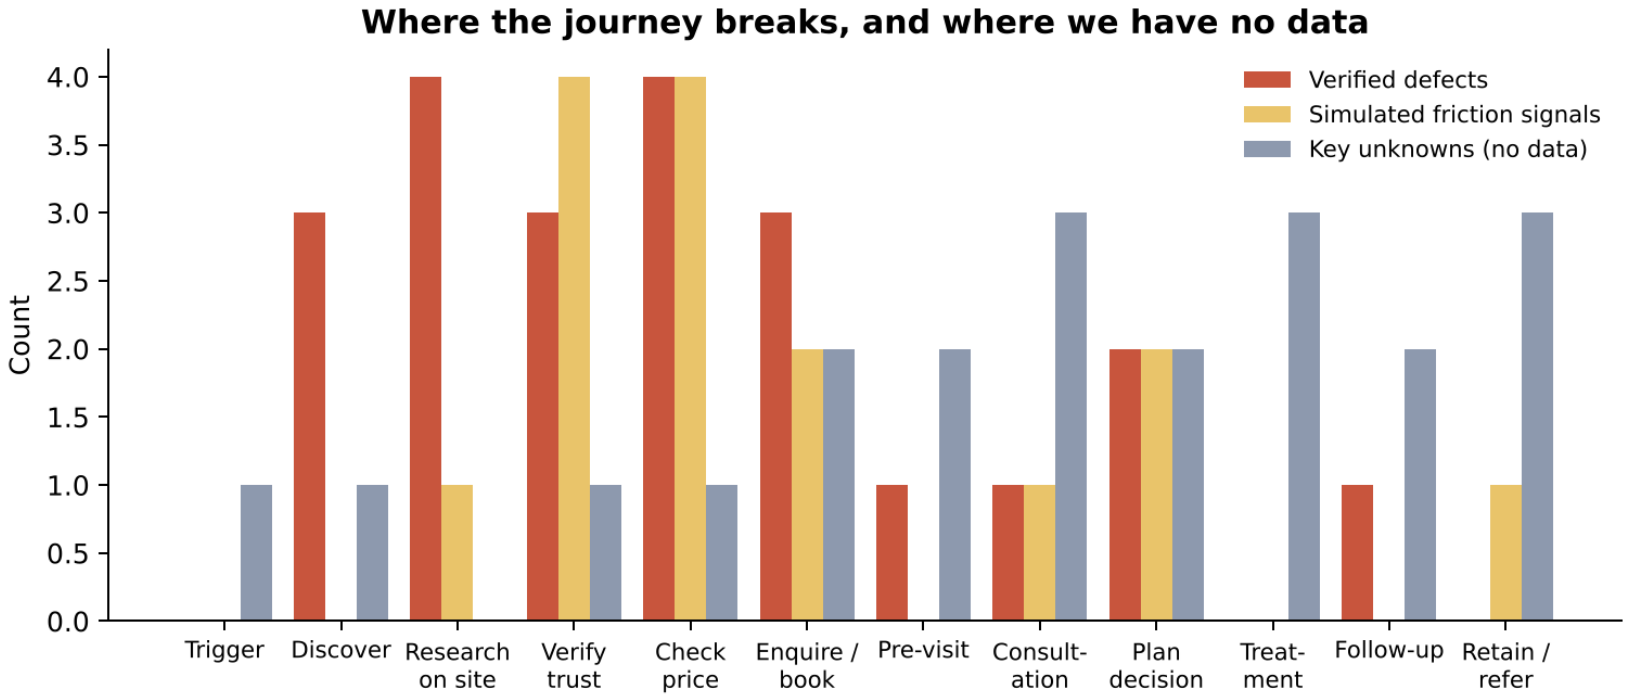

Simulated signal [S]

- 'Who will treat me?' raised in all five full runs
- 'Registered is not inspected': primed by the seed
- Treat as hypotheses H04 and H05
- A nearby aesthetics rival shows a CQC 'Good' rating (2023, via search)

Source: Crawl; competitor-benchmark.md B5; report-audit.md U1 | The HVN strategy review · 15 Oct 2026 · 8

Customer journey: where it breaks, and where we are blind

17 verified defects before booking; almost no data after it

Moments that matter

- Women's-health visitor lands on the wrong page
- 'What will it cost overall?'
- 'Who treats me; is it regulated?'
- Broken menu links
- Calling from a phone
- What a client leaves the consultation with

Segments: each has a verified blocker

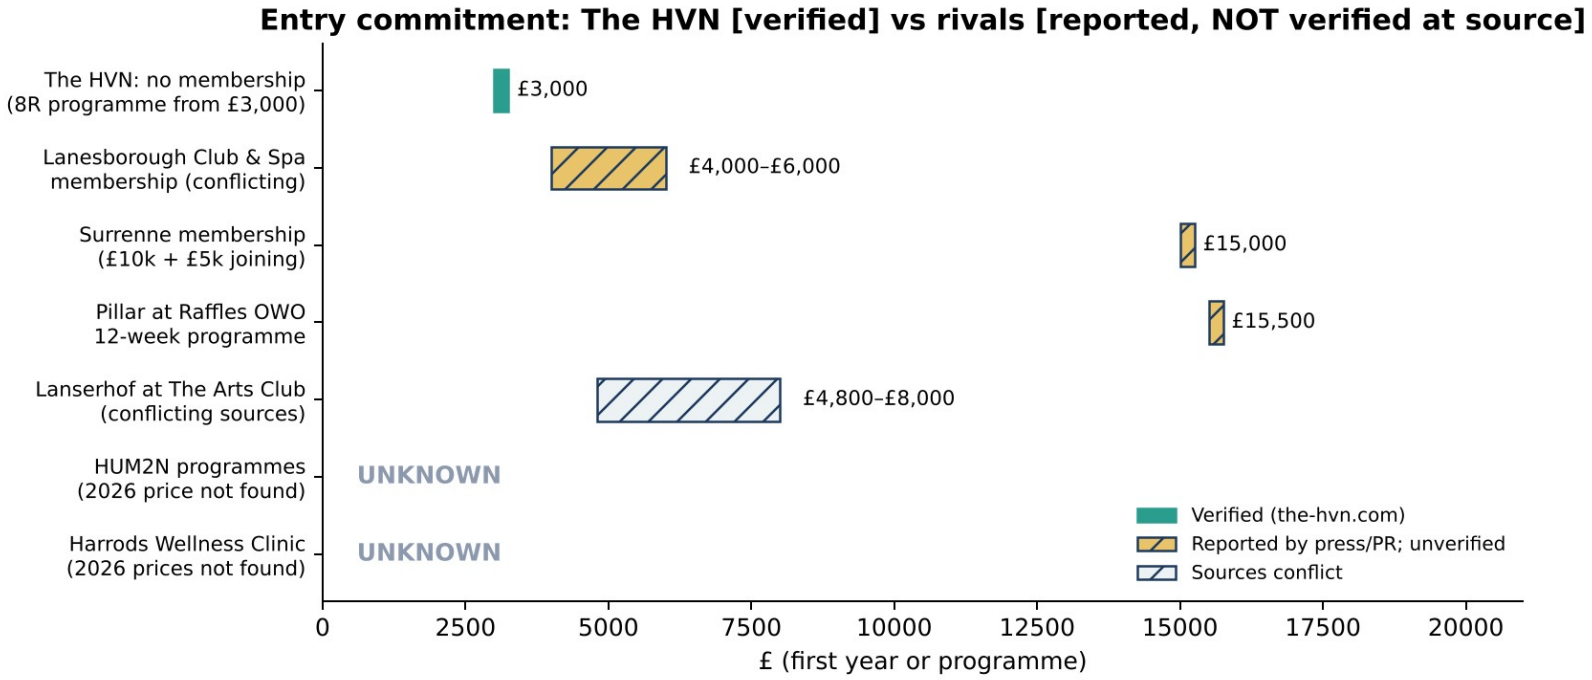

Segment existence is evidenced by The HVN's own pages; behaviour is hypothesis

Segment	Entry point (verified)	Biggest verified blocker	Validate
Burnt-out executive	Fatigue page; NAD; Discovery £350	Plan unpriced; NAD price conflict; no tap-to-call	H01, H10
Longevity optimiser	8R; blood profiles £450/£550; HRU £750	Only 8R priced; test list/lab not stated	H02
Aesthetics regular	£175 consultation; injectables from £260	Generic practitioner block; no credit rule	H04
Women's health	Menopause, PCOS, PMDD; acupuncture from £200	Acne treatments shown	H08
Fertility / IVF	Fertility acupuncture; panel £500	Conflicting start prices; sessions unstated	H01
International visitor	Jet Lag IV £375; Hydrobed	No tap-to-call; no visitor package	H10
Gatekeeper (PA)	Contact; terms; CQC badge	Unlinked badge; two numbers	H12

Source: customer-journey-map.md §4; personas.md

Competitors: reported landscape, nothing verified at source

All rival prices, memberships and ratings are UNKNOWN until checked on their own sites

Hooke London (up to £54,000/yr, press 2025) omitted for scale. Lanserhof range spans the conflicting reported figures. Sources: competitor-benchmark.md.

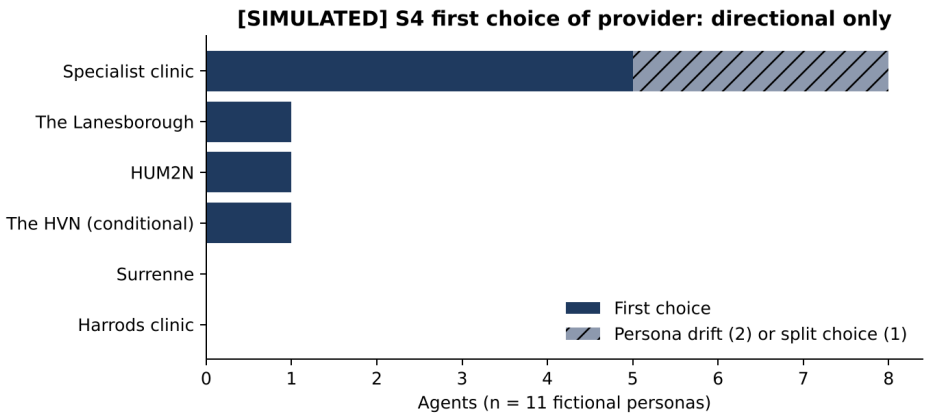

Reading [H]

- Rivals reportedly sell membership and belonging
- The HVN's verifiable edges: price transparency + one team
- Its gaps: plan pricing, visible quality proof, single-need depth
- New 2026 supply: HUM2N at Six Senses; Four Seasons memberships

Where The HVN can win, and where it probably loses

Hypotheses to test, not conclusions

Dimension	The HVN (verified)	Rivals (reported)
Access model	Pay per visit	Membership clubs
Price transparency	High (single services)	Fees / on request
Clinical breadth, one team	Yes	Operators or partners
Visible quality signal	Badge unlinked; status ?	Some rated (e.g. CQC Good)
Setting and belonging	Clinic + rituals	Heritage hotels, clubs
Single-need depth	Doctor + TCM; page defect	Specialists

[SIMULATED] fictional personas; seed primed 'no membership' and 'not inspected'. Use only to choose what to test.

SWOT, with confidence

Strengths

- Doctor-led team, one address [V]
- Prices on ~98% of service pages [V]
- No membership or joining fee [V]
- Doctor check before IV [V]
- Open 7 days [V]

Weaknesses

- Plan step unpriced; 404 programmes [V]
- Women's-health pages wrong [V]
- Broken links; tap-to-call on 1 page [V]
- Unlinked CQC badge; status unknown
- Claim wording; no measurement [V]

Opportunities

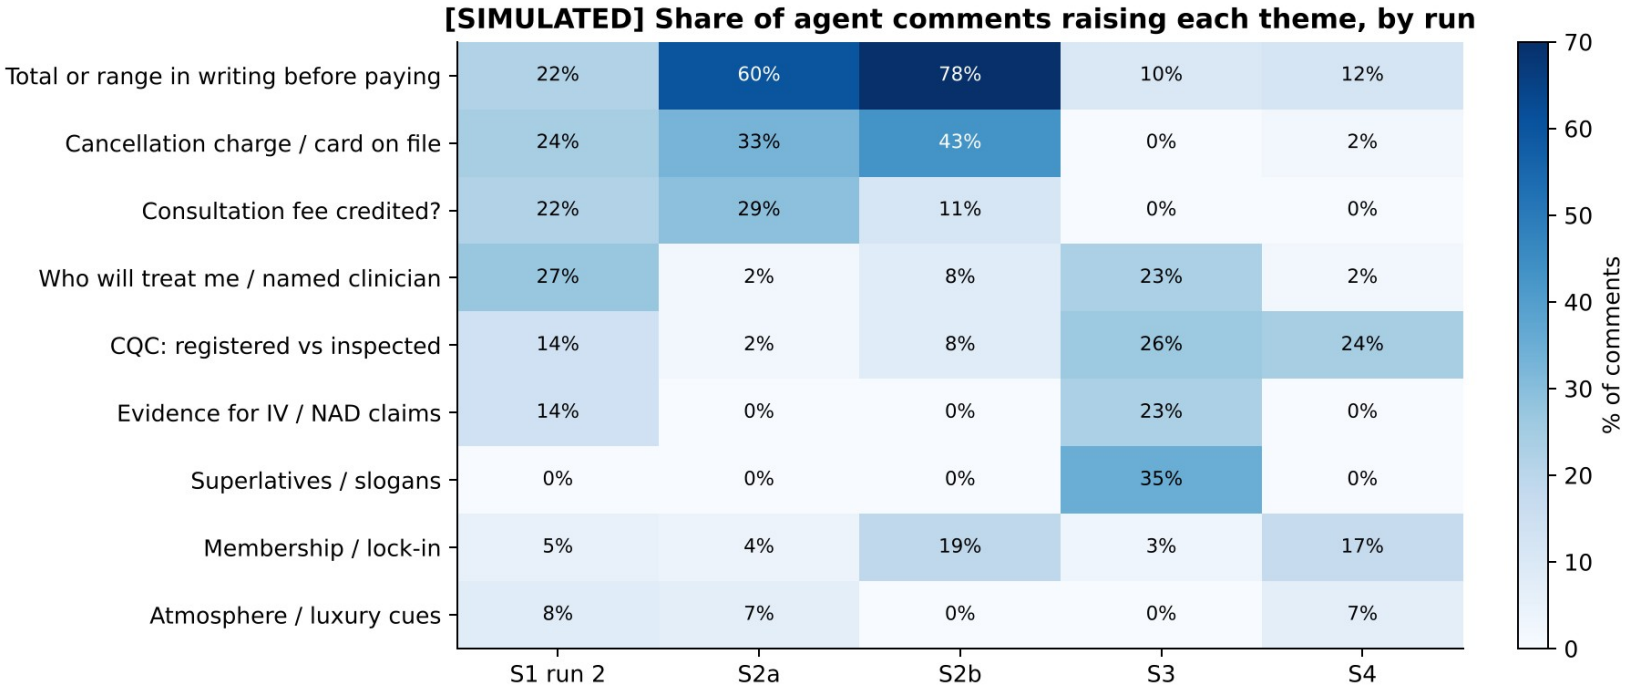

- Transparent alternative to clubs [Low]
- One team for multi-need clients [Low]
- Women's health and fertility [Low–Med]
- Evidence-honest positioning [Med]
- Cheap SEO wins [High]

Threats

- New 2026 hotel longevity supply [R]
- £15.5k programme anchors [R]
- Lower-priced specialists [R, Low]
- ASA scrutiny; licensing pending [Reg/R]
- Rivals' visible ratings [Reg via search]

What the simulations are worth

Useful for generating hypotheses; not evidence of customer behaviour

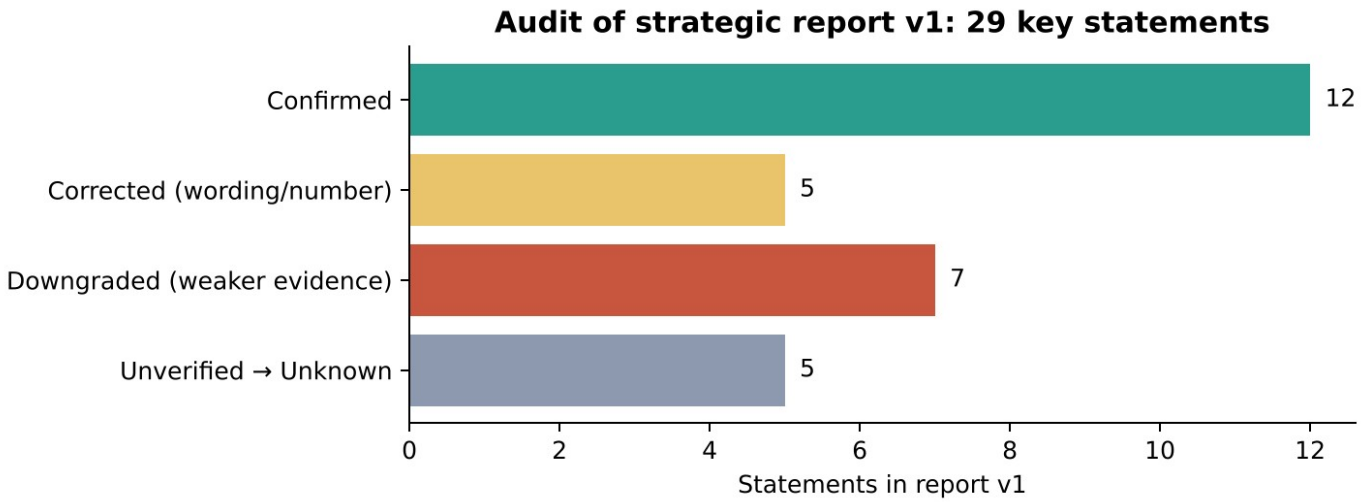

Keyword-based count over all agent comments in results/*/raw/simulation-db-export.json. Fictional LLM agents, not customers.
Themes were partly prompted by each run's seed and opening posts (e.g. S2a asked 'Would you pay a consultation fee just to find out the total?').

Limits

- One model plays every persona; cautious voice
- Seeds and opening posts primed key themes
- S3 never tested the alternative taglines
- Fabricated 'experiences' excluded
- No demand, conversion or WTP measured

We audited our own v1 report

29 key statements re-checked: 12 confirmed, 5 corrected, 7 downgraded, 5 now Unknown

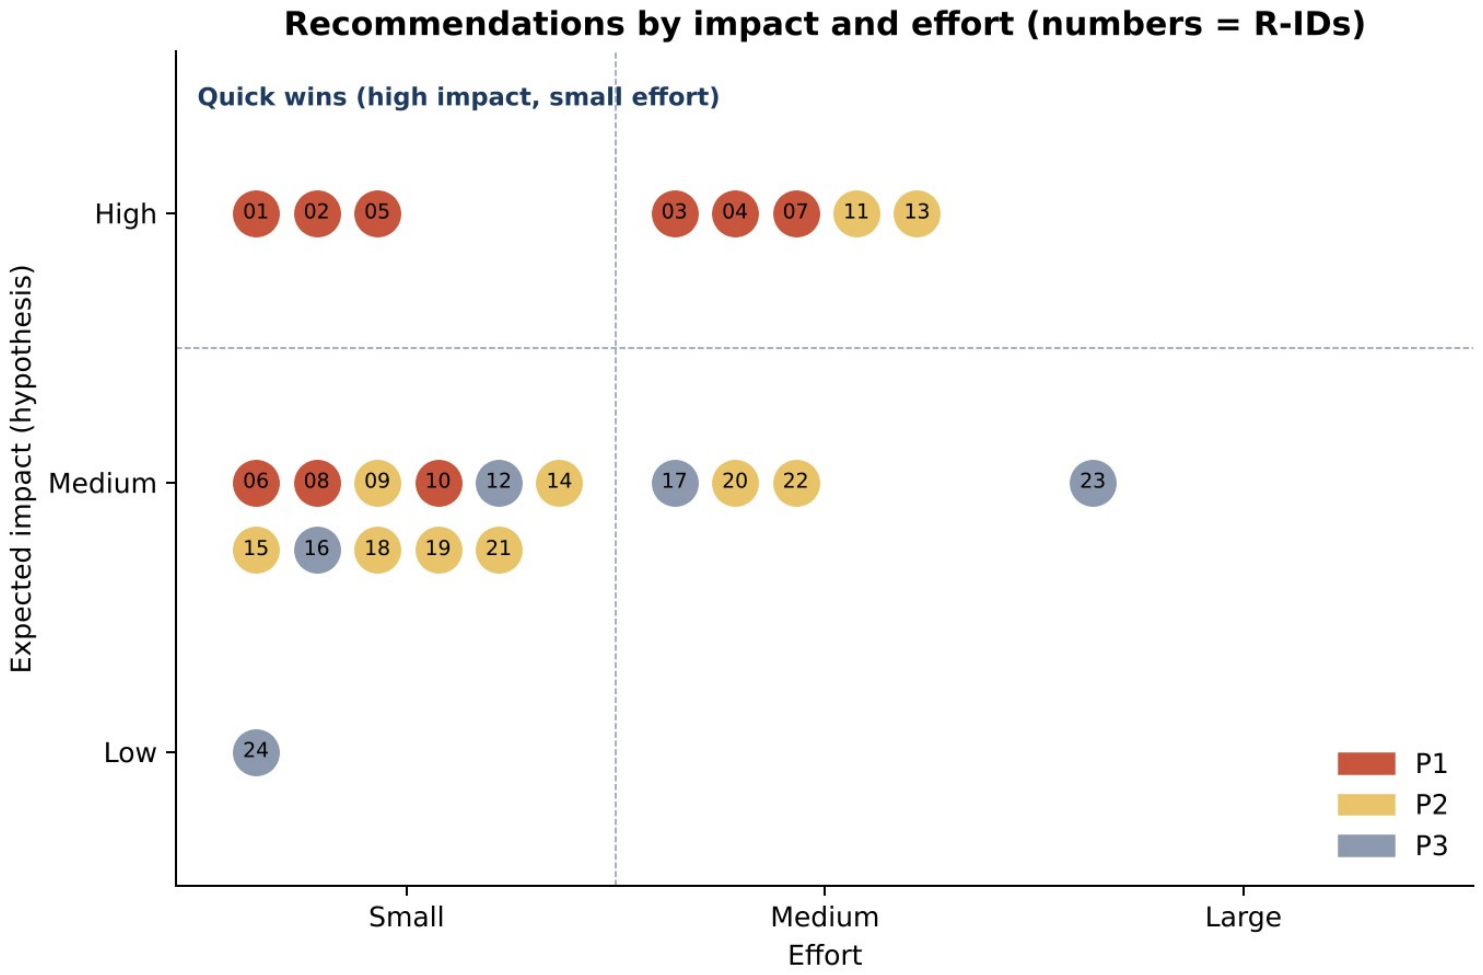

What changed in v2

- CQC status and all competitor figures → Unknown
- Simulation counts labelled 'primed' where the question led
- Positioning and starter pathway: validate, then adopt
- Added benchmark, journey map, register, roadmap, validation plan

Source: report-audit.md | The HVN strategy review · 15 Oct 2026 · 15

24 recommendations by impact and effort

Most high-impact items are small or medium effort

Quick wins

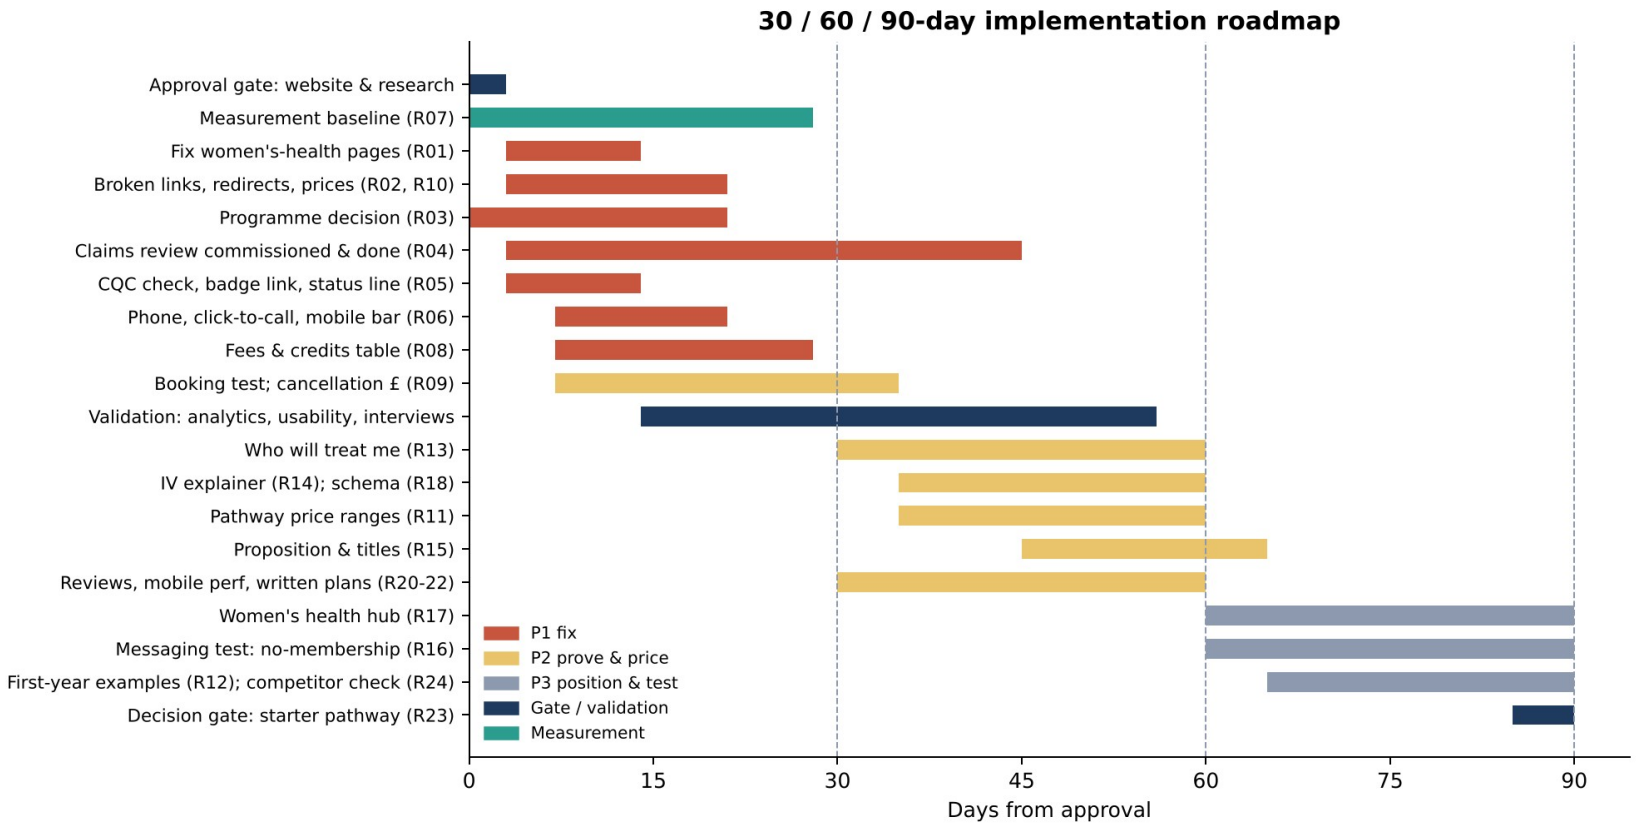

- R01 Women's-health pages
- R02 Broken links
- R05 CQC check + link
- R06 Tap-to-call
- R08 Fees and credits
- R10 Price conflicts

Priority 1: the first 30 days

ID	Action	Evidence · confidence	Effort	Owner (role)	KPI
R01	Fix Menopause/PCOS/PMDD pages	Live re-check · High	Small	Marketing + women's-health doctor	3/3 fixed; booking clicks
R02	Repair menu and internal links	Broken-links CSV · High	Small	Web developer	0 internal 404s
R03	Decide programme tier; redirect	Crawl · High	Medium	CEO + Medical Director	Decision; 0 retired 404s
R04	CAP-code claims review	Crawl + ASA · High	Medium	CEO + adviser	100% items resolved
R05	Verify CQC; link badge; status line	Crawl · High; status ?	Small	Registered manager	100% linked; signed off
R06	One number; tap-to-call; mobile bar	Crawl · High	Small	Developer + Ops	tel: 100%; call clicks
R07	Analytics + funnel baseline	Study gap · High	Medium	Marketing + agency	Baseline captured
R08	Fees and credits table	Re-check · High	Small	CEO + Finance	Credit queries ↓
R10	Remove price conflicts; sessions	Price register · High	Small	Marketing + Ops	0 conflicts

30 / 60 / 90-day roadmap

Fix and measure → prove and price → position and test

Checkpoints

- Day 30: baseline; 0 internal 404s; women's-health fixed; CQC line accurate
- Day 60: who-treats + IV explainer; ranges decided; validation read-out
- Day 90: positioning decided on evidence; pathway go/no-go

How we will measure progress

Baseline first (weeks 1–4), then targets

Stage	KPI	Source
Discover	Organic clicks to service and concern pages	Search Console
Research	404 page views; engaged sessions	GA4
Price check	% enquiries tagged price / total / credit	Enquiry log
Book	Booking-intent rate (book + call + WhatsApp + form) / sessions	GA4 events
Book	Booking completion; median first-response time	Pabau; enquiry log
Consultation	Consultation-to-plan conversion within 30 days	Pabau
Retain	90-day repeat rate; reviews per month and rating	Pabau; Business Profile

Validation: small, cheap, real

≈ 6 weeks · ≈ £1,000–£1,800 external · no simulated agents counted as respondents

Workstream	What	Cost
A Analytics baseline	GA4 events, Pabau funnel, enquiry log	Staff time
B Booking test	Staff test, mobile and desktop, no payment	½ day
C Usability	5–6 non-clients, 5 tasks on the live site	£400–£600
D Interviews	8–12 clients, lapsed enquirers, gatekeepers	£400–£600
E Copy tests	After claims review and approval	Later

Approval gates

- G1 booking test + tagging
- G2 non-client panel + incentives
- G3 contacting clients/enquirers
- G4 any website change or A/B test
- G5 any competitor enquiry

Hypotheses the simulations raised, and how to test them

ID	Hypothesis	Prior	Method	Changes
H01	Unknown plan totals stop people booking a paid consultation	M/L	Interviews, usability, enquiry log	R11, R12
H02	A published range is enough	L	Interviews, usability	R11
H04	Naming the clinician raises trust and intent	M	Usability mock-up, interviews	R13
H05	Prospects check CQC status (after verifying it)	L	R05, then interviews	R05
H06	'No membership' is a positive differentiator	L	Interviews, later A/B	R15, R16
H07	Concrete safeguards beat superlatives	L–M	Usability (two heroes)	R14, R15
H08	Integrated route can win single-need women's health	L	Search Console, interviews	R17
H13	Verifiability matters more than setting	L	Interviews	Positioning

Risks and how we manage them

Risk	Mitigation
CQC status differs from the earlier assumption	Verify at source before any wording is published (R05)
Claims review takes longer than 30 days	No new IV/longevity copy or paid media until done
Price ranges anchor clients wrongly	Base on 12 months of Pabau data; test wording first
Simulation-derived messaging misleads	Validation gates H06, H07, H13 before any proposition change
Competitor facts are stale	Quarterly verification at source (R24)
Website changes break booking links	QA checklist; re-crawl after every release

Source: implementation-roadmap.md; strategic-intelligence-report.md §13 | The HVN strategy review · 15 Oct 2026 · 22

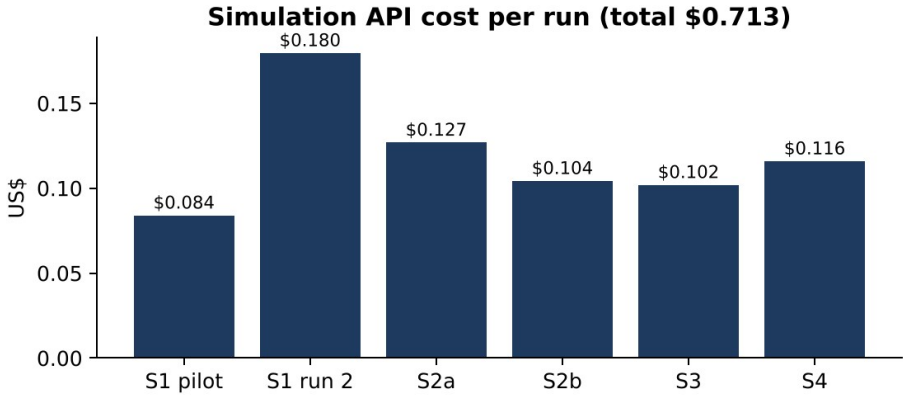

Decisions requested today

1. Approve the 30-day fix list: R01, R02, R06, R10 (website-change gate G4)
2. Ask the registered manager to verify CQC status and scope at source (R05)
3. Decide which programmes exist today; publish or redirect (R03)
4. Approve an external CAP-code claims review (R04; quote needed)
5. Set the consultation fee-credit policy (R08)
6. Approve measurement setup and validation gates G1–G3 (≈ £1,000–£1,800)
